Workshop overview
The course aims to strengthen research skills among nursing and allied health professionals and students (postgraduate) encouraging them to utilize research-generated knowledge in routine clinical practice. It presents an overview of research designs and statistical methods and provides a hands-on training on various stages of research from problem formulation to study design, data collection, data analysis and interpretation. By the end of the workshop, participants will be able to:
✓ Understand the importance of conducting research
✓ Plan, design and conduct a research study
✓ Communicate the study findings

Who should attend
This workshop is primarily aimed at faculty and (postgraduate) students of nursing and allied health sciences.

Course Faculty
Course faculty will be from St John’s College of Nursing and from St John’s Medical College & Research Institute.

For further enquiry
Dr Kavya R, MBBS, MPH, PGDHHM
Course Director
Assistant Professor, Division of Epidemiology & Population Health
St. John’s Research Institute

Dr Geraldine Menezes, PhD
Co-director
Professor, Dept. of Biochemistry
Vice Dean, Allied Health Sciences
St. John’s Medical College

Mrs Maryann Washington, MSc, M.Phil
Co-director
Adjunct Professor (Nursing)
Division of Epidemiology & Population Health
St. John’s Research Institute

Registrations
Payment can be made through:
✓ Demand Draft drawn in favour of St. John’s Research Institute, Bangalore
✓ NEFT [beneficiary name: St. John’s Research Institute; bank name: Bank of Baroda; beneficiary’s bank A/c #: 05210100024920; branch: John Nagar, St. John’s Medical College, Koramangala, Bangalore-560034; IFSC code: BARB0STJOHN (5th digit zero)]

Workshop fee:
Before 30th December - Rs.2000/- (for students) & Rs.3000/- (for faculty)
After 30th December - Rs.2500/- (for students) & Rs.3500/- (for faculty). Filled registration form with details of DD/NEFT transfer (your name and transaction ID) should be sent to: epibio@sjri.res.in

080-49467032
Each session will have 25-30 minutes theoretical presentation followed by 15-20 minutes of hands-on practical training. Participants will work in groups to develop a study protocol during the course. These protocols will then be presented to research experts for critical feedback and suggestions for future improvement. It is advisable that participants bring a laptop of their own to the workshop.
