

# Digital CME

## Indian Society of Pediatric Nephrology

12th December 2020 | 3:30 - 8:30 PM (IST)

13th December 2020 | 1:00 - 5:00 PM (IST)

Indian Society of Paediatric Nephrology is pleased to host a digital CME that brings well-known international and national speakers on a virtual platform. COVID 19 pandemic has resulted in all of us adapting to e-world of teaching and learning. Academic committee of ISPN has designed an interesting programme to provide an update in chronic kidney disease and transplantation on first day and a pot-pourri of common renal disease in children on second day. We hope to engage with attendees using a combination of didactic lectures, panel discussion and case-based approaches. Trainees will get an opportunity to present their research work.

### HIGHLIGHTS

- Central venous lines vs arterio-venous fistulas in children with ESKD
- Genetic testing in CKD
- Handling hostile bladders peri transplant and recent advances in immunosuppressive management of after transplantation
- Ethical dilemmas in managing children with CKD
- Difficult to treat nephrotic syndrome
- Refractory rickets in children
- Repurposing role of pediatric nephrologist during COVID 19 pandemic
- GFR estimation in children
