ISiHC short course

Course Objectives

This course was created in recognition of the need to employ a modern scientific approach to aid in the implementation of projects or programmes that are aimed at ensuring that needed healthcare interventions are made widely available within health systems.

Because Implementation Science is a relatively new field, this short course aims to be an introductory course.

Course Details

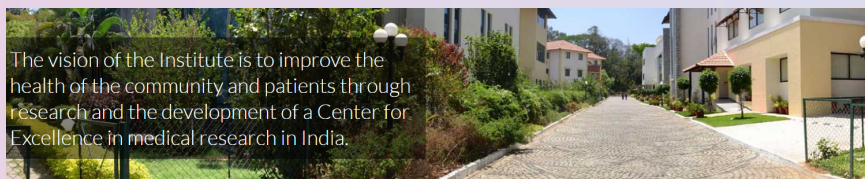

This is a 2.5 day short course. It is aimed at improving implementation research capacity among participants who may register as single participants or as a team of two participants from diverse disciplines but aiming to work together as a team. The course participants may be programme managers (government or private), implementation researchers, medical college teaching faculty, public health professionals, project scientists or students.

Registration

Registration is to be done online at the weblink given below. Payment for registration is accepted via credit/debit card or net banking using a payment gateway.

It is to be paid along with the submission of the registration form and the medical council registration details (for doctors only) directly on the website.

For registration and payment, go to: www.sjri.res.in

Course Schedule

Day 1 (full day)	Implementation Outcomes Team-building & Partner Engagement Study Phases Frameworks Study Designs
Day 2 (full day)	Qualitative & Quantitative Research Methods Implementation Strategies Modeling Sample size calculation & Statistical Analysis
Day 3 (half day)	Monitoring & Evaluation

- each day there will be a session of 'Implementation Science in Practice' to learn from the experts
- each day there will be a practical session towards grant-writing
