e-learning Course on 'Medical Certification of Cause of Death' (*e-MCCD 4.0*)

Course details

This web-based course on 'Medical Certification of Cause of Death' can be taken up at one's own free time and convenience.

- ◆ The complete duration of this course is 10 hours but it can be completed over a period of one month
- ◆ Upon successful completion, all participants will be awarded **Course Completion Certificate** from **St John's Research Institute**

Course Objectives

Medical Certification of Cause of Death (death certificate) is an important source of cause-specific mortality data for a country. Apart from being a public health surveillance tool, a medical death certificate is also a legal document for the family of the deceased. To the treating physician, it is a tool to improve quality of care. The physician has to issue this 'death certificate' to the family of the deceased. Inaccurate entries in these death certificates can lead to incorrect mortality data collection, faulty public health measures and legal hassles.

- ◆ This course aims to strengthen the capacity of medical practitioners in ensuring accurate medical certification of cause of death
- ◆ It is divided into **4 Modules** with each module comprising of two to four Units
- ◆ To obtain the Course Certificate, a participant has to complete all the Modules/Units and then take up the final assessment and obtain 66%(40/60) marks within a month of enrolment
