

Division of Health and Humanities

A maximum of two students will be accepted into the program for the year 2022.

Admissions will be restricted to students who have an active UGC NET (or equivalent) fellowship of 5 years with stipend.

The research program under Health and Humanities aims to examine

1. Ethical, cultural, behavioural and societal aspects of novel areas of biomedical research
2. Public and community engagement.
3. Using humanities frameworks (theories and methods) in understanding health, illness, patients and therapies and medical education.
